EDUCATION

Vellore Institute of Technology

B.Tech. Computer Science and Engineering (Health Informatics) - CGPA: 8.71

Bhopal, India

2023 - 2027

EXPERIENCE

Software Development Intern

November 2025 - January 2026

Eazotel

- Owned and shipped production-grade communication and analytics integrations (WhatsApp, Exotel, Google Ads Insights) for a multi-client SaaS platform using Node.js, Express.js, and MongoDB.
- Built secure, webhook-based REST APIs with JWT and Meta OAuth, automating Meta lead engagement and handling 100+ automated messages and calls per day, eliminating manual outreach.
- Integrated features into live production systems actively used by multiple hotel clients, ensuring scalability, reliability, and ongoing optimization.

Web Development Team Core Member

August 2025 - December 2025

TEDx VIT Bhopal

- Led full-stack website development, primarily spearheading the backend architecture. Designed Node.js/Express.js and MongoDB RESTful APIs to successfully manage over 500+ event registrations.

Core Technical Team Member

November 2024 - May 2026

Microsoft Technical Club

- Co-organized CodeGaruda 2025, driving 600+ registrations and 30% higher engagement, while leading 5+ workshops and hackathons impacting 1,000+ students.

PROJECTS

Ticketify | Node.js, Express.js, MongoDB, JWT, Socket.IO

[Live](#) | [GitHub](#)

- Built a role-based event ticketing platform enabling event creation, ticket booking, and organizer-led ticket verification.
- Designed and implemented RESTful APIs for authentication, event management, and ticket booking using Node.js, Express.js, MongoDB, and JWT.
- Implemented QR-code ticket generation, ownership-based authorization, and real-time seat availability updates with Socket.IO; deployed using Vercel, Render, and MongoDB Atlas.

VyaaparBill | Python, OCR, LLMs, Flask, MongoDB

[GitHub](#)

- Built an AI-powered invoice parsing system using OCR and LLMs to extract structured data from invoices.
- Implemented automated invoice processing workflows with JSON-based output generation and validation.
- Evaluated regex, OCR, and LLM-based extraction techniques to improve parsing accuracy and reliability.

Elite Expo Hub | Node.js, Serverless Functions, API Security, Production Deployment

[Live](#)

- Architected a secure, serverless form-processing backend using Node.js and Vercel Edge Functions.
- Mitigated public endpoint automated scripting abuse by implementing Google reCAPTCHA v3 middleware.
- Optimized asset compression and global CDN pathways to retain a 95%+ Lighthouse efficiency rating.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python

Technologies: Node.js, Express.js, MongoDB, SQL, REST APIs, JWT, OAuth, Webhooks, HTML, CSS

Developer Tools: Git, GitHub, Postman, Vercel, VS Code, Cursor, Jupyter Notebook

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

ACHIEVEMENTS

- National Finalist (Top 20 Teams Pan-India), in BRAINWARS 2026 Case Study Competition organized by Bain Capability Network. May 2026
- Selected among 10 coordinators from 500+ applicants for the Blue Yonder campus placement drive. Oct 2024
- Semi-Finalist, Health Hackathon co-hosted by Johns Hopkins University. Feb 2025
- Led team to 3rd place in Division 22 of the International Collegiate Chess League. Apr 2025
- State Level Bronze Medalist, 400m Sprint, UP State Athletic Meet. Dec 2019
